Dear Claus Kusk Hjørnet,

Your project has now been evaluated by the FLSmidth CEL VI Jury headed by Jørgen Huno Rasmussen.

The proposal emphasizes a very important area for FLSmidth's customers. Cement Patent Committee has evaluated potential IP issues and made a decision to publish the basic content while it seems to be known fact already.

The Jury does not see this as suitable CEL project, but supports the already on-going activities to get the first installation sold to one of our customers.

The Jury wishes to thank you for your contribution and effort in participating in this competition.

On behalf of the CEL Jury

Kimmo Vesamäki
