Re. : Letter of recommendation

I hereby confirm, that B.Sc. Claus Hjørnet, from his graduation to the present, has been an employe of Burmeister & Wain Energi A/S (BWE).

During the app. two years Mr. Hjørnet was employed in my department for environmental technologies, he showed a talent for project managing of research and demonstration projects.

In the following app. 4 years Mr. Hjørnet and a colleague undertook the transfer of technology from licensors to BWE, and formed the departments for the new technologies.

Throughout his employment Mr. Hjørnet has participated in sales and marketing activities, and has occasionally presented the findings of his experimental work at seminars in-house and abroad.

Through his cooperation with clients and business partners, Mr. Hjørnet has gained experience with large scale international projects, and has established a good contact network.

Mr. Hjørnet has proved himself to be a highly skilled engineer with a great engagement in his work. He has thus won the respect of his colleagues and fellow scientists, and it is with pleasure I give him my best recommendations.

Burmeister & Wain Energi A/S

Sales Manager,
M.Sc. K. R. Christiansen
